ERRATA, Vol. 56, Nos. 1-27, July-December, 1949

PAGE	TITLE BEGINS	CORRECTION
3	Heavy Nuclei	Par. 4, lines 10, 11, read . . . also there, Dr. Phyllis Freier, and Dr. E. J. Lofgren. In subhead and par. 6, line 1, delete new.
26	Poison Ivy	Par. 3, line 7, Exodus for Genesis.
30	America's Cherubim	Par. 5, line 14, Northwestern University for president of Central Scientific Company, Chicago.
41	Atomic Scientist Attacks	Col. 1, line 10, 17,500 for 37,000; line 11, 20,000 for 34,000; line 13, 6,000 for 16,000.
59	Jupiter Now Prominent	Par. 4, line 2, introvert for extravert; line 3, read extravert-feeling-intuitive wife.
68	Confirm Opposites	Amber insects considered Oligocene, about 50 million years old.
72	Insects in Baltic Amber	Par. 1, lines 2, 3, read patients who have hemianopsia and cannot.
79	Range of Vision	Col. 2, line 8, delete American.
216	Tungsten Filament	Line 4, insert after Los Angeles, Dr. Hildegard Howard, Los Angeles Co. Museum.
265	Bones of Birds	Col. 3, delete last two sentences.
318	Poinsettia Pointers	Subhead, line 2, current for charge.
387	Earth's Current	

GENERAL SCIENCE

Ancients Taught Science As a Writing Exercise

► IN 300 B. C. in what is today Iraq the ancient Sumerians taught the sciences of botany, zoology, geography, mineralogy, mathematics, and linguistics. They instructed their youth in these sciences, not because they had technological application, but primarily to teach the difficult art of writing Sumerian script.

The land of Sumer, "was the seat of the predominant civilization in the ancient Near East," Dr. Samuel Noah Kramer of the University of Pennsylv-

vania told the American Association for the Advancement of Science annual meeting.

In order to teach future scribes how to write, he said, the Sumerian "professors" compiled lists of words which students committed to memory, and then reproduced as copying exercises.

These lists were actually classified tables of facts pertaining to the different sciences. These very early classifications of specialized knowledge—actually a form of science textbooks—are "already beginning to prove of no little significance for the history of science," Dr. Kramer said.
